A. Definition of “Technical Difficulty”

- Technical problem with equipment, and or internet, resulting in loss of communication.

- B. If the judge should encounter a technical difficulty the round will be paused at the point in the speech in which communication was lost. No more than 3 minutes will be allotted for a judge to resolve any technical issues before his or her ballot is tossed out and the speaker is asked to resume the speech. The Speaker Rank for the missing ballot will be determined based on the average Speaker Rankings of the remaining judges.
- C. If a competitor should encounter a technical difficulty the speech will resume at the point at which communication was lost. Each competitor will be allotted a total of 2 minutes to handle any technical difficulties. Any time beyond the 2 minute marker will result in a forfeit for the competitor for that event’s round. The competitor is still able to compete in their remaining events and rounds should he or she regain connectivity after their last event was closed. The competitor must be ready by their next appointed time slot. The competitor who is unable to reconnect will receive the last speaker rank for that event/round. All remaining events will be calculated in the standard competition method.
- D. Should the room have two or more competitors that are unable to complete their speeches, the virtual room judges will need to weigh placement based on the quality of the speech up until the point of disconnection. All completed speeches must be ranked above any uncompleted speeches.
